DETAILED ACTION

Response to Amendment

1. This communication is in response to the special amendment of 9/7/2005. Accordingly, Claims 11-18 are currently pending in the application.

Allowable Subject Matter

1. Claims 11-18 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

2. Claims 11 and 18 is are allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose **accessing the controlling node in a non-PRP mode where multiple nodes are not contending for access to the controlling node; and accessing the controlling node in a PRP mode where multiple nodes are contending for access to the controlling node.** It

is noted that the closest prior art, Zimmerman et al. (US6785252) discloses a mesh network having a plurality of communication nodes, wherein one or more nodes may be either a contending node when sending data for transmission within the mesh network or a controlling node for receiving data for transmission with the mesh network.

However, Zimmerman et al. fails to disclose or render obvious to the above underline limitations as claimed.
